1. Understanding The Context

An entrepreneur has created an online cryptography course and would want to advertise it on her blog. She currently targets audiences originating from various countries.

In the past, she ran ads to advertise a related course on the same blog and collected data in the process. She would now like to employ your services as a Data Science Consultant to help her identify which individuals are most likely to click on her ads.

2. Specifying the Analysis question

Identify which characteristics sets out the individuals who click on Ads on the Cryptography course blog.

3. Metrics of Success

I'm able to clearly identify which individuals are most likely to click on ads using the provided data.

4. Recording the Experiment Design

1. Data loading and overview
2. Data Cleaning
3. Univariate analysis
4. Bivariate analysis
5. Summary of findings
